DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species 1: the embodiment of figure 1

Species 2: the embodiment of figure 2

Species 3: the embodiment of figure 4

Species 4: the embodiment of figure 6

Species 5: the embodiment of figure 7

The species are independent or distinct because species 1 does not require heating by utilizing the waste heat from a reformer of the fuel cell, species 2 does not require utilizing ozone to oxidize the pollutants, species 3 does not require increasing the degree of humidification, and species 4 does not require a second humidifier between the second pollutant removing means and the fuel cell.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1745

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
